SQL Query ⓘ

```
1   SELECT
2       wp_pods_gbg_product_vitals.image_url,
3       wp_pods_gbg_product_vitals.name,
4       wp_pods_gbg_product_vitals.brand,
5       wp_pods_gbg_product_vitals.car_model,
6       wp_pods_gbg_product_vitals.model_type,
7       wp_pods_gbg_product_vitals.acc_cat_name,
8       wp_pods_gbg_product_vitals.sku,
9       wp_pods_gbg_product_vitals.gtin,
10      wp_pods_gbg_product_vitals.Price,
11      wp_pods_gbg_product_vitals.product_id,
12      Concat('<a href=https://carro.gr/?p=', wp_pods_gbg_product_vitals.product_id, '>Δείτε το</a>') as LinkToView,
13      Concat('<a href=https://carro.gr/?add-to-cart=', wp_pods_gbg_product_vitals.product_id, '>Προσθήκη στο Καλάθι</a>') as LinkToCart
14  FROM wp_pods_gbg_product_vitals
15  
```

📄 View Documentation

The issue was due to the fact that although LinkToView does not exist in the database, it is computed in wpdatatables, I had by accident enabled search in the LinkToView "field"

So I had this error:

[Fri Jul 22 11:25:48.265277 2022] [proxy_fcgi:error] [pid 16061:tid 140341797541632] [client 94.71.4.171:0] AH01071: Got error 'PHP message: WordPress database error Unknown column 'wp_pods_gbg_product_vitals.LinkToView' in 'where clause' for query S............vitals WHERE (`wp_pods_gbg_product_vitals`.`name` LIKE '%d%' OR `wp_pods_gbg_product_vitals`.`brand` LIKE '%d%' OR `wp_pods_gbg_product_vitals`.`car_model` LIKE '%d%' OR `wp_pods_gbg_product_vitals`.`model_type` LIKE '...', referer: https://carro.gr/

As soon as it was disabled it worked fine.
