

First picture shows the employee panel with two customers booked for the 31.10.2023 at 09:15. To see all the information you have to click on the arrow on the right side of this line.

The screenshot shows a user interface for an employee named 'werk@statt.statt'. The main section is titled 'Termine'. At the top, there are two filters: a date range '24.01.2023 - 18.02.2023' and a location 'Europe/Berlin'. Below these, a table lists bookings. The first row is highlighted in grey and shows the date '31.01.2023'. The second row shows the time '9:15', the service 'Reifenwechsel', the customer 'Matthias Hänsch, zrdz ...', and the status 'Freigegeben' with a right-pointing arrow.

| Service: | Kunde: | Status: |
|------------|---------------|---------------------------------------|
| 31.01.2023 | | |
| 9:15 | Reifenwechsel | Matthias Hänsch, zrdz ... Freigegeben |

In the second picture you can see the results of opening the arrow from the first picture. Now you can see all the information from all two customers. What I need to have is a employees panel which does not group the customers which have booked the same timeslot. Just show the timeslots in separate lines.

The screenshot shows the same user interface as the first image, but with the arrow from the first booking expanded to show detailed information. At the top, the date range and location filters are the same. Below the table, a grey box contains the following details:

- Dauer: 15Min
- Kunden:
- Matthias Hänsch**
E-Mail: gutscheine@fhunii-media.com
Preis: €80,00
Payment Status: Ausstehend
Zahlungsmethode: Rechnung
Sind die Reifen bei uns eingelagert?: Ja
- zrdz Hänsch**
E-Mail: matthias.haensch@outlook.com
Preis: €80,00
Payment Status: Ausstehend
Zahlungsmethode: Rechnung
Sind die Reifen bei uns eingelagert?: Nein
