

## Creating Editable Tables in WordPress where users can see and edit only their own data

Dear Sir/ Madam,

I would like to ask you if with wp datatables I can build the below idea for a client.

I have a project for 50 DRIVING SCHOOLS that means 50 users

1. I want the user to log in with email and password
2. Then they will see a table like the example below
3. I want them to be able to select from the columns the number (float or manually enter the number) of students they have for each category and save it.
4. I want the admin if possible to be able to see all the table list with the results of the categories.

SCHOOL NAMES	CATEGORIES			
	A	B	C	D
DRIVING SCHOOL 1	1	2	2	4
DRIVING SCHOOL 2	1	2	2	4
DRIVING SCHOOL 2	1	2	2	4
RESULTS	3	6	6	12

Please let me know if it's possible to build it with wp datatables plugin.
