

Ameilia Service Set up - Adina Docter

Issue: Service price not updating on frontend.

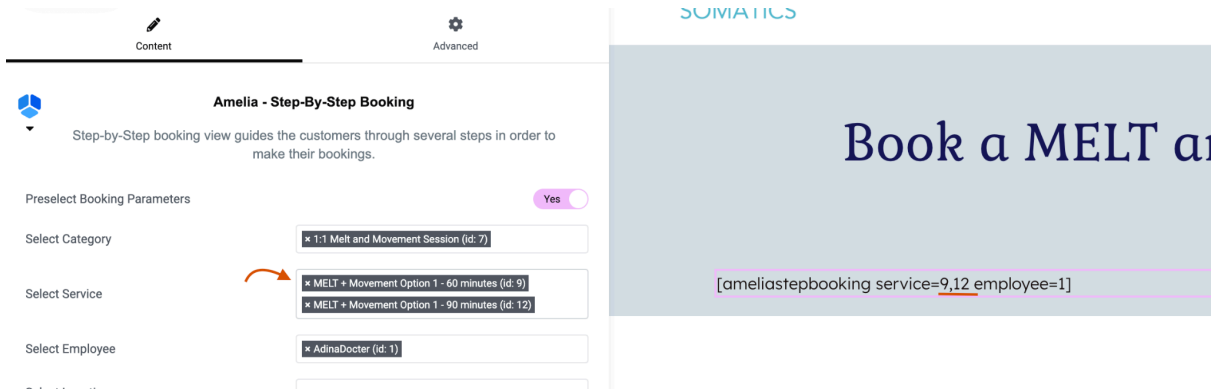

Services

Back End within Amelia Plug in

1:1 Melt and Movement Session Sort Services: Custom

 MELT + Movement Option 1 - 60 minutes (ID: 9)	Duration: 1h	Price: \$45.00 
 MELT + Movement Option 1 - 90 minutes (ID: 12)	Duration: 1h 20min	Price: \$65.00 

Set up via Elementor Pro website builder

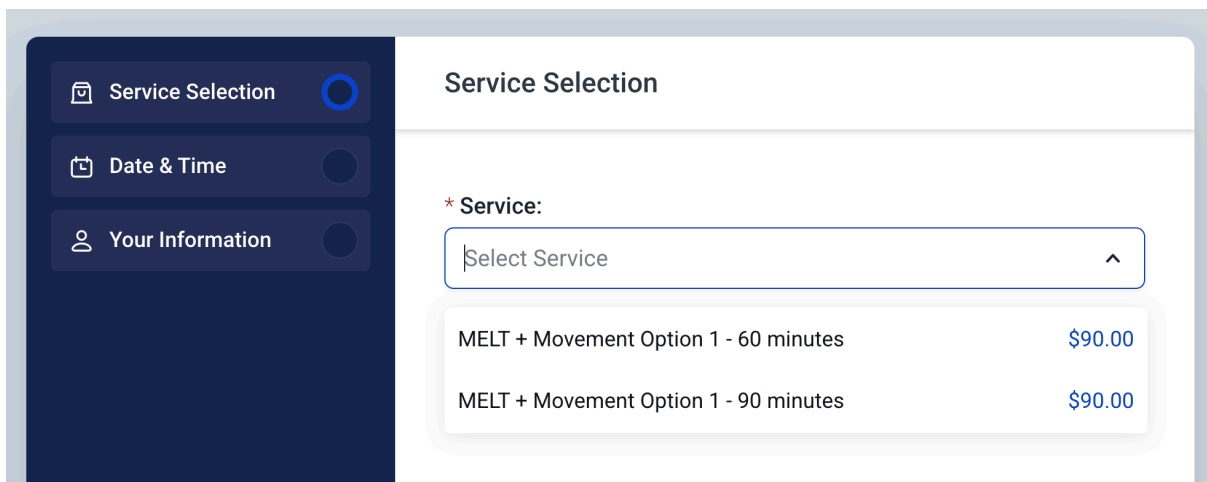

The screenshot shows the Elementor Pro interface for configuring the Amelia - Step-By-Step Booking widget. The configuration panel on the left includes:

- Content / Advanced tabs
- Amelia - Step-By-Step Booking title
- Description: Step-by-Step booking view guides the customers through several steps in order to make their bookings.
- Preselect Booking Parameters: Yes
- Select Category: 1:1 Melt and Movement Session (id: 7)
- Select Service: MELT + Movement Option 1 - 60 minutes (id: 9) and MELT + Movement Option 1 - 90 minutes (id: 12)
- Select Employee: AdinaDocter (id: 1)

The preview on the right shows a dark blue header with the text "SOMATICS" and "Book a MELT at". Below the header is a code snippet: `[ameliastepbooking service=9,12 employee=1]`.

Frontend (published site)

Even once services have been saved and the webpage updated, this is what it looks like on the front end:

The screenshot shows the frontend booking page. On the left is a dark blue sidebar with three menu items: "Service Selection" (selected), "Date & Time", and "Your Information". The main content area is titled "Service Selection" and features a dropdown menu labeled "* Service:". The dropdown menu is open, showing two options:

MELT + Movement Option 1 - 60 minutes	\$90.00
MELT + Movement Option 1 - 90 minutes	\$90.00

It seems to update everything but the price...
